

A product of ZoomRx

Bring Your Own Data

A fully customizable enterprise search solution

WHAT MAKES OUR BYOD SOLUTION UNIQUE?

Complete Data Compatibility

Presentations, spreadsheets, documents, recordings, file drives - our solution seamlessly handles it all.

Models Never Trained On Your Data

Our life sciences knowledge graph removes the need for training any language models on your data.

Chart & Graph Data Extraction

Ferma delves deep into visualizations, extracting the underlying quantitative data from charts and graphs.

No Hallucinations; Grounded Citations

BYOD uses Retrieval Augmented Generation (RAG), which means answers only rely on the data you provide.

Customized Workflows

Ferma develops customized workflows or "modules" tailored to the specific needs and use cases of our clients.

On-Premise Hosting Options

Ferma's BYOD solution enables you to keep your enterprise data in your VPC where it is private and secure.
